PROFESSIONAL SUMMARY

Frontend Developer with hands-on production experience shipping a full-stack e-commerce checkout flow and maintaining live client websites. Comfortable across the modern React/TypeScript stack as well as WordPress theme and plugin development, with direct exposure to payment, subscription, and shipping API integrations. Seeking a frontend or full-stack role where I can build performant, user-facing interfaces and continue growing into production ownership.

TECHNICAL SKILLS

- **Languages:** HTML5, CSS3, JavaScript (ES6+), TypeScript
- **Frontend:** React, React Router, Tailwind CSS
- **CMS & Platforms:** WordPress (theme customization, plugin development, e-commerce setup)
- **Integrations:** Payment gateways, subscription billing models, shipping & REST API integration
- **Tools:** Git, GitHub, VS Code, Vite, Vercel

EXPERIENCE

Full Stack & WordPress Development Intern

Feb 2026 – May 2026

Ratxen Solutions Private Limited — Gurugram, India (Remote)

- Built and deployed Nexa Styles, a full-stack e-commerce platform, integrating payment gateway, subscription billing, and shipping API modules into a single, unified checkout flow taken from design through production deployment.
- Developed and customized WordPress themes and plugins for client websites, optimizing code and assets specifically to reduce page-load time.
- Maintained and updated two live production websites, MVA Trust (mvatrust.com) and NCPL (ncpl.net.in), handling ongoing content, bug fixes, and feature requests throughout the internship.
- Completed the full 90-day internship with an “Excellent” performance rating (6/6) — the top rating awarded by the organization.

PROJECTS

Recipe Finder — *React, JavaScript, Tailwind CSS, TheMealDB API*

- Built a responsive recipe search application with debounced search, a card grid layout, and a detail modal to keep the interface fast and uncluttered while querying a third-party API.
- Implemented a client-side favorites system using React state, plus loading skeletons and explicit empty/error states to keep the UX resilient under slow or failed API calls.

[Live Demo](#) | [Source Code](#)

Expense Tracker — *React, TypeScript, Recharts, Tailwind CSS*

- Built a fully typed expense tracker using dedicated Expense and Category interfaces, with no use of 'any', to keep the codebase type-safe and self-documenting.
- Added category-level spending visualization with Recharts, plus date-range and category filtering and a live running total for at-a-glance financial insight.

[Live Demo](#) | [Source Code](#)

Portfolio Website — *HTML, CSS, JavaScript*

- Built an interactive terminal-styled portfolio with a custom command interpreter, full keyboard navigation, and a responsive, accessible layout — used as a distinctive showcase piece rather than a template-based site.

EDUCATION

Bachelor of Computer Applications (BCA)

2026

PES University

CERTIFICATION

- Internship Completion Certificate — Full Stack Development & Digital Marketing, Ratxen Solutions Private Limited (2026)
